

IN THE IOWA DISTRICT COURT FOR POLK COUNTY

PLANNED PARENTHOOD OF THE
HEARTLAND, EMMA GOLDMAN
CLINIC, and JILL MEADOWS, MD

Petitioners,

v.

KIM REYNOLDS ex rel. STATE OF
IOWA and IOWA BOARD OF
MEDICINE,

Respondents.

Equity Case No. _____

AFFIDAVIT OF ABBEY HARDY-
FAIRBANKS, M.D.

1. I am the Medical Director of the Emma Goldman Clinic (EGC). I provide reproductive health care to patients of EGC, including abortion services. I am a board-certified Obstetrician/Gynecologist (obgyn). At the Emma Goldman Clinic I am responsible for training medical students and residents. In addition, I have given academic presentations on medical and surgical abortion to family medicine and gynecology physicians. I attach my CV hereto as Exhibit A.

2. I submit this affidavit in support of Plaintiffs' Motion for a Temporary Injunction to enjoin enforcement of Section 4 of Senate File 359 ("the Act") to be codified at Iowa Code § 146C.2, based on my own personal knowledge.

3. EGC is an independent reproductive health care clinic. It provides a full range of reproductive health care services at its Iowa City location. These services include well-women exams, cancer screenings, STI testing and treatment, a range of birth control options including

long-acting reversible contraception or LARC, transgender healthcare, and medication and surgical abortion. We provide medication abortion using mifepristone and misoprostol during the first 70 days of pregnancy, as measured from the first day of the last menstrual period (LMP).

We provide for surgical abortions through 19.6 weeks gestation by Imp.

4. In 2017, of over 600 abortions EGC provided, only 11 (approximately 2%) occurred before six weeks Imp.

5. EGC currently provides surgical abortion through 19.6 weeks Imp.

6. I am concerned the Act effectively bans abortion for my patients at EGC who desire to end an unwanted pregnancy.

7. The Act will harm my patients, as they will be prevented from receiving the abortions they need to end undesired pregnancies. Given that we do not regularly see pregnant patients until after a fetal cardiac tone can be detected, they will not have the chance to choose abortion, even if they otherwise need or want it.

8. My patients will lose their ability to decide their future and determine what is best for their welfare and that of their family.

9. My patients select abortion to end a pregnancy for diverse reasons. Sometimes their concerns are financial. Other times they are victims of domestic or sexual abuse. Sometimes they worry that the pregnancy will have ill effect on their own health. Statistically, most women seeking abortion already have had at least one child and understand what is involved in carrying a pregnancy and caring for a child. They have thought about what is best for their particular unique situation. In some cases, a wanted pregnancy has complications that makes termination the choice they believe is best for their potential child.

10. The Act contains an exception for patients with a physical condition that threatens

their life or poses “a serious risk of substantial and irreversible impairment of a major bodily function.” Iowa Code § 146B.1(6). This is an extremely limited exception. For example, I would not be able to provide my patient with an abortion based on physical health risks such as previous severe pregnancy related complication.

11. I will have to balance my desire to protect my patient from harm with my concern about how the Board of Medicine will interpret the language of the Act. I have the same concern about how I will determine whether a pregnancy is the result of “rape” or whether an embryo or fetus has a condition that is “incompatible with life.” These exceptions are not well-defined and reasonable professionals can have differing opinions.

12. I have first-hand knowledge of how restrictions to abortion results in harm to women’s health.¹ My patients already face significant financial, legal and logistical barriers to seek abortion care. Restrictions disrupt the relationship that patients have with their provider and are an obstacle to safe and timely medical care

13. Maternal mortality during pregnancy, delivery and postpartum in the United States, unlike other developing nations, is increasing.² Women who opt to continue pregnancies are exposed to increased risks of death and major complications from childbirth and those rates are 14 times higher than for abortion.³

14. Unwanted pregnancies are especially hard on low-income and poor women, as well as women in abusive relationships.

¹ Increasing access to abortion. Committee Opinion No. 613. American College of Obstetricians and Gynecologists. *Obstetrics and Gynecology* 2014; 124:1060–5.

³ Raymond EG and Grimes DA. The comparative safety of legal induced abortion and childbirth in the United States. *Obstetrics and Gynecology*. 2012 119(2 Pt1):215-9.

15. We know that when abortion is banned or severely restricted, women will seek means to end unwanted pregnancies that are outside of the extremely safe practice of legal abortion. They can be significantly harmed or die from doing so.

16. If this Act is allowed to stand, it will prevent my patients from accessing a procedure they need. As a physician, I know that keeping women from accessing this crucial option will threaten their health and safety.

Signed this 14th day of May 2018.

The undersigned, being first duly sworn on oath, depose and state that I am the Affiant making the foregoing statement; that I have read the same and know the contents thereof; and, certify under penalty of perjury and pursuant to the laws of the state of Iowa, that the statements and allegations contained therein are true and correct as I verily believe.
